

RPG Wall™

Your first line of defense.

The RPG Wall system is a modular pre-detonation screen designed to protect field units from rocket-propelled grenades and other anti-armor munitions. Ideal for combat zones and high-risk areas, the RPG Wall is a simple and effective tool for enhancing the safety and security of high-value assets.

With its modular panel system, the RPG Wall allows for the construction of a custom-sized wall of varying configurations. Panels are 5 feet x 5 feet and feature a durable, anti-corrosion, powder-coated finish. Each panel weighs approximately 325 pounds.

The RPG Wall is quick and easy to assemble in the field. Panels are connected with a hinge pin and secured with a retaining clip. The wall can then be configured in the required angular positions. A three-panel system takes approximately ten minutes for three people to assemble, with no tools required.

Specifications

Product name: RPG Wall

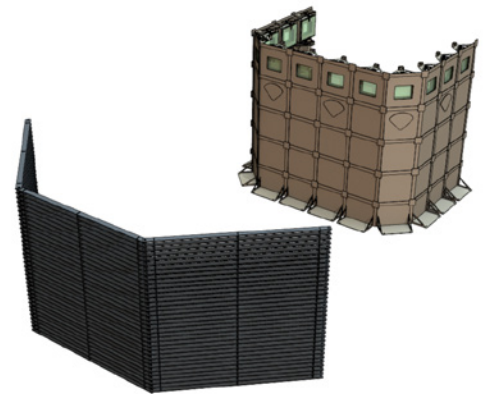

Description: Modular pre-detonation screen for anti-armor munitions

Weight: ~ 325 lbs per panel

Sentry Protection System (SPS)

While the RPG Wall is a useful defensive tool on its own, its effectiveness and the safety of your troops and personnel can be maximized when it is used as part of the Sentry Protection System. The SPS combines a standard STEGO kit with three sections of RPG Walls to create an area of maximum security.

With the SPS, soldiers are protected on all levels, from bullets and blasts to RPGs and other anti-armor munitions, while maintaining a clear view of incoming threats. The SPS affords a combination of visibility, versatility and portability that you won't find in any other defense system.

Defenshield, Inc.

Defenshield, Inc. is a veteran-owned, New York corporation manufacturing bullet, blast and fragment resistant equipment for the government, military, law enforcement, and the private sector for anti-terror, force protection, and physical security requirements. Defenshield products are currently saving the lives of a diverse range of customers around the world.
